

APPROVE MINER

It is the first step to enter the beans route, it is to approve the currency you are going to spend from any of our mines

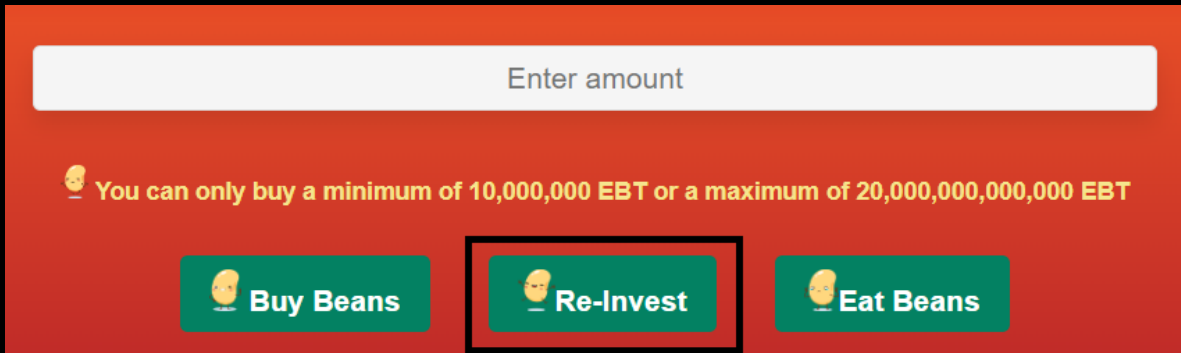

The Mission

To bring a fun and positive environment back to De-Fi whilst providing a simple, safe and rewarding avenue to earn passive income at the click of a button.

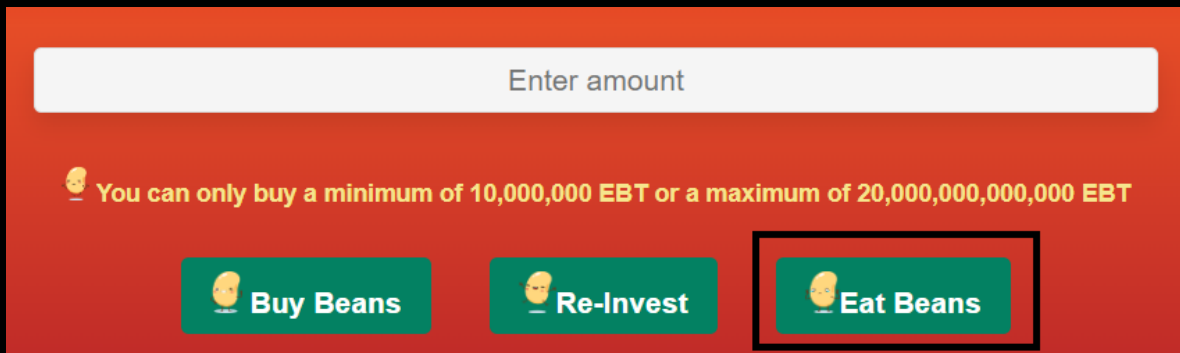

The Vision

We created this application with the vision that it would be interactive, allowing you to reinvest or withdraw your earnings with just one click.

You can Re-Invest from a minimum of 80,000,000 EBT. Re-Invest means reinvesting your earnings.

Enter amount

 You can only buy a minimum of 10,000,000 EBT or a maximum of 20,000,000,000,000 EBT

 Buy Beans  Re-Invest  Eat Beans

With a simple click, you can withdraw your earnings without any ifs, ands, or buts in Eat BEANS.

EXCLUSIVE CONTENT

Our contract is 100% verified, and no type of proxy is used to modify any function or to withdraw the locked TLV, so your funds will be completely safe here. The TLV is locked, and there will be no inconvenience if it is audited.

Code Read Contract Write Contract

 **Contract Source Code Verified** (Exact Match)

Contract Name: **EPICBEANS**

Compiler Version **v0.8.17+commit.8df45f5f**

 **Contract Source Code** (Solidity Multiple files format)

```

We are a meme coin that offers supply reduction and provides an escrow and mining for passive income. There is and will be no more with the token.

How to Access

The EPICBEANS dApp will need to be accessed via your Web3 browser or wallet extension. Metamask via a ledger hardware wallet is recommended for maximum security and seamless use. Standard Metamask and Trust Wallet extensions can also be used. ***As a reminder, never share your seed phrase with anyone***

Please ensure that you always use verified links found on the official channels and social links provided below for ease of use!

Basic Functions

The steps for using EPICBEANS dApp are simple, easy and effective. With only three buttons on the dApp, if you can run a computer, you can keep up to the game.

BUY BEANS: Used during your initial investment

RE-INVEST: Used to compound your investment

Eat BEANS: Earn that Cold Hard \$\$\$\$\$ EBT \$\$\$\$\$

BUY BEANS

When baking your EBT on the dApp, the smart contract will deposit your EBT into the TVL (into the contract). The EBT BUY BEANS into the TVL is locked, it will be returned via the "My rewards" section of the dApp. Next you will receive "BEANS" which ultimately act as the number of tokens you own. These "BEANS" will autoEBTally kick start your path towards passive income generation. The minimum deposit for BUY BEANS is 1 EBT. ** Please note if using a referral code for a deposit, the referral code used MUST be invested into EPICBEANS dApp!!!

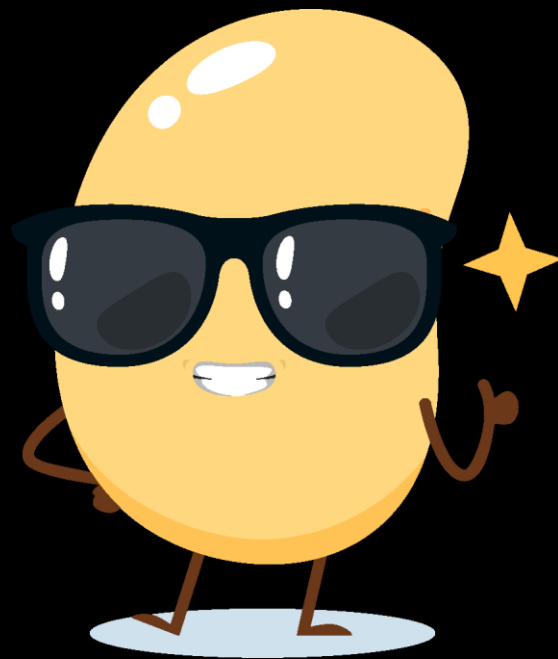

RE-INVEST

The RE-INVEST function will be available once your rewards have begun to accumulate. It is a requirement to accumulate 80,000,000 EBT before being able to RE-INVEST

this is to ensure the BINANCE gas fees are not higher than the RE-INVEST amount (autoEBTally derived within the smart contract). Once that time has come you will be to use the "The RE-INVEST" button to compound your rewards into the locked TVL. Once this function is initiated your rewards counter will restart to zero and your "BEANS" amount will increase. The increase of BEANS will be determined by amount in TVL combined with how many rewards are RE-INVEST.

Eat BEANS

The Eat BEANS function is simply put why all investors join this project. This is where your hard-earned EBT gets returned to your aforementioned Metamask or Trust Wallet so you can go buy real life BEANS...or maybe a Lambo! The amount received will vary depending on which day you decide to eat and will be explain later in the whitepaper. The only transaction fees apart from the "hasBEANS" tax will be the standard gas fees which are in place on the BINANCE network.

Marketing - 4% on BUY BEANS | 5% on Eat BEANS

3%* Static Daily Rewards - You earn 3%* daily on the amount of "BEANS" you hold within the project. As you RE-INVEST and TVL increases, so do your rewards.

Referral System

It will pay 5% reward for each referral that invests \$100 in EBT.

Max Wallet

20,000,000,000,000 EBT Max per Wallet.

"HasBEANS" Tax

The "HasBEANS" tax punishes those who are out for themselves and encourages investors to play the game and sustain the project. The "HasBEANS" tax works as follows:

Day 1 - Eating BEANS incurs 90% Loss (0-24 hours)

Day 2 - Eating BEANS incurs 80% Loss (25-48 hours)

Day 3 - Eating BEANS incurs 70% Loss (49-72 hours)

Day 4 - Eating BEANS incurs 60% Loss (73-96 hours)

Day 5 - Eating BEANS incurs 50% Loss (97-120 hours)

Day 6 - Eating BEANS incurs 40% Loss (121-144 hours)

Day 7 - Eating BEANS incurs 30% Loss (145-168 hours)

Day 8 - Eating BEANS incurs 20% Loss (169-192 hours)

Day 9 - Eating BEANS incurs 10% Loss (193-216 hours)

Day 10 - No Loss incurs | Standard fees (216-240 hours)

Day 11 - Resets back to Day 1

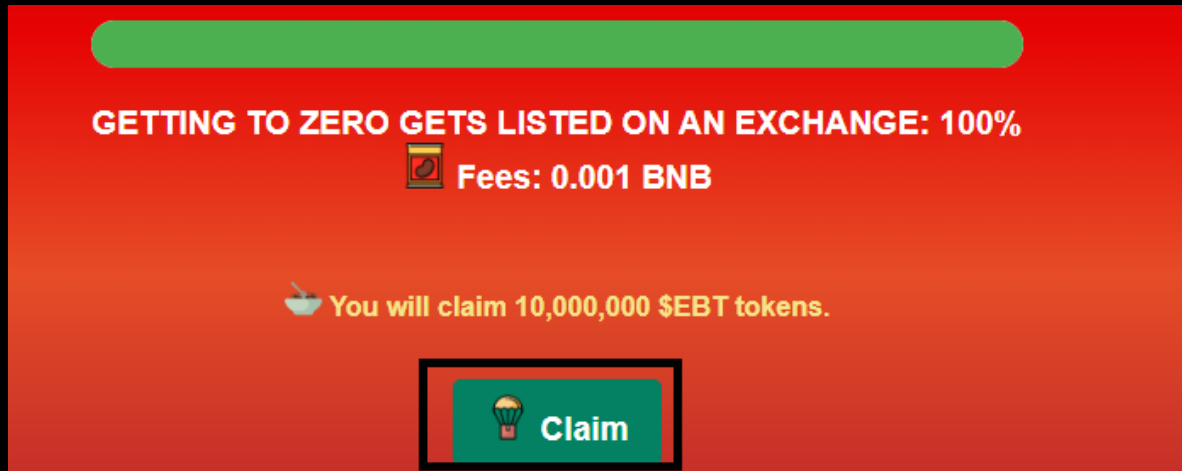

Please note: Any 'Eat' within this time period will reset your timer back to Day

1

Max Withdraw is 300% of EBT deposited per wallet Example: Mr. JHOE DOE deposits 1 EBT, his wallet will only be able to withdraw 3 EBT from the TVL.

CLAIM AIDROP

It's as easy as pressing a button and claiming the reward; this will help us to list the token on multiple exchanges, perhaps someday even on Binance. Everything is possible.

GETTING TO ZERO GETS LISTED ON AN EXCHANGE: 100%

 Fees: 0.001 BNB

 You will claim 10,000,000 \$EBT tokens.

 **Claim**
